

EQUIP YOUR FUTURE...BLOW/FILL/SEAL TECHNOLOGY EQUIPMENT & REBUILDING

With over 25 years of experience in the industry, we are BLOW/FILL/SEAL specialists

B/F/S Rebuilding Process

Filling System: Complete upgrade with stainless steel contact parts designed for specific applications and install new product filter housing(s).

Air System: New piping of air system as required with new filter housings

Extruder/Parison Head: Rework or replace barrel and screw, install new motor and drive, and/or rebuild existing new parison to meet new application.

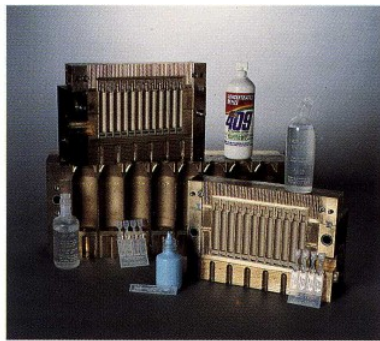

Take Out/Deflashing Assembly: Build a patented top deflasher into the machine for smooth operation

Guards and Safety: Complete safety interlocks with hydraulic lock-out and quick pressure dump. Additional guards incorporated where needed. Manual function security code through PLC for manual operation

Electrical Upgrade: Full PLC machine control with plasma touch screen interface and user-friendly prompts for easy and precise control.

General Upgrade: All hydraulic cylinders, vacuum valves, power pack and carriage can be fully rebuilt or replaced.

Installation and Warranty: Each rebuilt machine carries a 180-day warranty with in-plant startup and training.
